PROFESSIONAL SUMMARY

Computer Science & Engineering undergraduate (CGPA 8.68/10) at SMVITM, VTU, with hands-on experience across Java, Python, Spring Boot, React, and MySQL. Strong foundation in Data Structures & Algorithms, OOP, backend development, and REST APIs, with proven ability to build full-stack and AI/ML-integrated applications end-to-end using agile practices. Demonstrated leadership and communication through mentoring, technical workshops, and competitions. 2027 graduate eligible for Recruit CRM's Trainee Software Engineer programme.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, HTML, CSS
Backend: Spring Boot, JDBC, REST APIs, Flask
Frontend: React.js (React 19 + Vite), JavaFX
Databases: MySQL, MongoDB, Convex (Serverless BaaS)
AI / ML: Deep Learning, Google Gemini 2.5 Flash, Faster-Whisper ASR, gTTS
Core CS & Tools: DSA, OOP, MVC, SDLC, Agile, Git

PROJECTS

- LangBridge — AI-Powered E-Learning Platform** *Python · Flask · React 19 · Gemini 2.5 · Faster-Whisper*
- Built a full-stack AI web app for South Indian language acquisition (Kannada, Tamil, Telugu, Malayalam, Tulu, Kodava) with a React 19 + Vite frontend and Convex serverless backend.
 - Developed a Python Flask microservice integrating Faster-Whisper ASR for real-time pronunciation assessment, delivering multi-layer scoring and phonetic feedback via Gemini 2.5 Flash.
 - Implemented a gamification engine (XP, gems, streaks, leaderboard) and an SM-2 spaced-repetition algorithm for adaptive vocabulary review.
- Online Voting System** *Java · MySQL · JDBC · OOP*
- Built a database-backed voting application with authentication, session management, role-based access control, and duplicate-submission prevention using Java and MySQL via JDBC.
 - Applied OOP principles (encapsulation, abstraction, modularity) and followed full SDLC practices from requirements through testing.
- Supermarket Management System** *Java · JavaFX · MySQL · MVC*
- Developed an inventory and billing desktop application with role-based dashboards, using MVC architecture to cleanly separate UI, business logic, and data layers.
 - Implemented product management, stock tracking, and billing; demonstrated the system to faculty and peers.

LEADERSHIP & VOLUNTEER EXPERIENCE

- Resource Person & Technical Workshop Facilitator** — CodeTroopers — College Technical Club, SMVITM *2024 – Present*
- Conducted workshops on AI fundamentals, chatbot configuration, and object detection for 30+ junior students, strengthening technical communication and mentoring skills.
- Volunteer Educator** — IEEE Eureka — Rural Technology Outreach *2024*
- Educated rural-school students on AI, software development, and emerging technologies to promote digital literacy.
- Volunteer** — National Service Scheme (NSS), SMVITM *2023 – Present*
- Contributed to community initiatives requiring teamwork, coordination, and collaboration.

EDUCATION

B.E. Computer Science & Engineering, VTU — Shri Madhwa Vadiraja Institute of Technology and Management (SMVITM) *Jun 2023 – Jun 2027 (Expected)*
CGPA: 8.68/10 | Coursework: DSA, OOP, DBMS, Software Engineering, Computer Networks, Operating Systems
Class XII (Pre-University), 2023 — 83.83% | Class X (Secondary School), 2021 — 84.16%

ACHIEVEMENTS

- 1st Place — React Mini Project Competition, SMVITM:** Led team to first place delivering a fully functional React.js application.
- 2nd Place — Ideathon, MITK:** Proposed and pitched an innovative technology solution to a panel of judges.
